Models 3150, 3150FR and 1047 have been redesigned with a new low profile look to better accommodate child wheelchair applications. Model 3150 is now also adjustable so that it can be lowered to meet child height requirements.

Model 9001 will now come standard as a double pole double throw (DPDT) unit. That does mean we have *discontinued the 9001DPDT*.

We will be announcing more exciting changes throughout 2009 so please keep an eye out for our communications. If you have any questions, please do not hesitate to contact customer service.
